“WHAT ARE THOSE DIRTY BLACK & GREEN STREAKS ON MY ROOF?”

In most cases they are a form of algae or moss. *Gloeocapsa Magma*, commonly known as roof algae, thrives in humid and warm climates. It usually appears first on the North slope of the roof where shade and moisture is prevalent, and the result is usually black streaks. Once the algae attaches to a shingled roof, it feeds on the organic matter in the shingles. The fungus breaks down the shingle by loosening the ceramic granules. If not treated, roof algae will reduce the life of your roof, diminish your home's curb appeal and increase your cooling expenses.

Roof moss is more common in the Pacific Northwest and Canada and is an actual moss growth that can also be found on rocks and trees. It also accumulates on the North side of the roof and in shaded areas. Roof moss is very dangerous because it will grow underneath the shingles and act like a sponge, soaking up moisture. If left untreated, it will cause roof leaks.

Traditional cleaning methods involve high pressure washing and/or hazardous chemical ingredients such as bleach, sodium hydroxide (Lye), chlorine, or acid. These techniques and materials could damage your roof, landscaping, siding, brick, and other exterior surfaces.

Now there is a safer product on the market that can eliminate these problems.

Spray and Forget is a revolutionary no-rinse cleaner and preventive treatment that removes green and black algae, moss, mildew, fungus, and lichen stains from roofs, siding, decks, brick, stucco, stone, and other exterior surfaces, and prevents them from returning.

Spray and Forget es un producto revolucionario que limpia y previene el regreso de las algas verdes y negras causadas por el musgo, moho, hongos y manchas de liquen en los techos, apartaderos, patios, ladrillos, estuco y otras superficies exteriores.

Customer Testimonials

Dear Customer Service, Please know you have an outstanding product. I have literally bought 6-10 different moss/mildew/algae cleaners which have not worked at all on my sandstone patio at home (which is facing north and is in the shade). The only thing that worked was power spraying the stone 2 or 3 times a year, which was a considerable job. Spray and Forget worked like a miracle (no kidding). I have now used it on my walks, patio, and roof with excellent results. You clearly have an excellent product.

**David C. Preston, M.D. Assoc. Professor of Neurology
Cleveland, Ohio**

Thank you a million times! Your Product works just as you advertise. I felt strongly enough to sit down and write this e-mail to you. I have recommended it to a lot of friends and neighbors. Thanks again.

**J. Lee Springfield
New Jersey**

Your product did wonders for our house and garage which HAD a lot of moss growing on it. We are purchasing a second gallon as a preventive maintenance measure against future growth. Thank you.

**Debra Held
Sturgeon Bay, Wisconsin**

We used the Spray & Forget, it worked like magic! It's nice to see all the other cabins in our area covered with moss on the roof and ours is clean! I just wanted to let you know that it worked and I'm very pleased with the product. Thanks again! Thanks for your time and constant replies to my e-mails.
